

LOCAL SEARCH

Every patient question starts with a search.

Before a practice books, Google already answered.

01

Google assembles the answer

'best dermatologist near me' pulls from practices that publish. Not from thin directories.

02

Your profile and your page set the facts

Clear hours, real services, an honest answer on the page. That is the truth Google repeats.

03

The gap shows in the summary

No content means Google fills the answer from someone else's site. Often a competitor.

Verify the three signals today

- 1 Is the Google Profile claimed and complete?**
- 2 Do hours, phone and address match your site?**
- 3 Is there one clear page per service and city?**
